

Homerding Fans 19 Maniacs; 500 Fans Attend Game

Mitchel's Maniacs were defeated by Mokena's Aces Tues. nite. Score 5 to 0. "Lefty" Sullivan of the Chicago Mills pitched one inning for the Maniacs. Brook also of the Mills pitching staff, finished the game. Pitching from the second inning on.

This was one of the main sports events in Mokena this year. The Maniacs pitcher yielded eleven hits, while Homerding gave only three hits. Patty pitched an exceedingly good game, striking out 19 men.

"Lefty" and Brooks striking out 7 Aces. This was the fourth game that Mokena won this year.

The Aces were hitting the ball hard. "Butch" Muehler was again unconscious and got three hits, scoring one run. Cappel poled a hard drive for a home run off the pitching of Brooks. Mokena Aces star short stop George Lauffer won the barrel of Mitchel's beer which was donated by Mitchel's Brewery.

The game was attended by the largest crowd to attend a game in Mokena in many years, exceeding 500 people. The Aces and the Maniacs extend their thanks to all those who came and made this a great game.

Mokena Aces	P	A	B	R	H	S	O
C. Lauffer	1	3	0	1	1	1	1
Marti	3	3	1	2	1	1	1

Mitchel J.	3	0	0	2	1	1	1
Mitchel C.	3	0	0	2	1	1	1
Marti W.	3	0	0	2	1	1	1
Sullivan	3	0	0	2	1	1	1

The Mokena Aces will play the Ridgewood I. A. C. at Hayden's Field at 2:30 p. m. daylight saving time, Sunday, June 3rd. Come out fans and see a fast game. Come early and find a box seat with a cushion.

Mokena Memorial Day Program Is Impressive Affair

The Memorial Day program at Mokena sponsored by the News-Bulletin was a very successful affair.

The program was held in the Mokena public school auditorium with principal M. E. John acting as chairman. The front of the stage was decorated with flowers and flags. A unique and impressive arrangement was the placing of 17 white draped chairs on the platform in memory of the 17 soldiers who lie buried in the three Mokena cemeteries. These soldiers fought in three wars, revolutionary, civil and world war. As editor Wm. Semmler read the roll call, Miss Virginia Nebeker placed a red peony on each vacant chair.

Commander Tyler and members of the Wm. Martin Post No. 725 V. F. W. of the Lincoln Estates took part in the program, having charge of the presentation of the flag and Commander Tyler read the famous order No. 11 of Gen. John A. Logan issued in 1863 fixing the date and observance of Memorial day.

Rev. G. Gerhold, pastor of the St. Peter Evangelical church of Frankfort delivered the Memorial Day address. He stressed the ideals on which the nation was founded and sounded a keynote of warning that we today are in danger of losing that priceless heritage which our nation's founders bequeathed to us and pointed out that mob sociology is a great menace to our freedom today. We must think for ourselves and must cling to the principles and precepts of our early forefathers which made this the greatest nation on earth, if our flag is to continue to represent freedom and justice for all.

The Frankfort school band played a number of selections and made a real hit. They made a fine appearance in their natty new uniforms.

The Mokena school children sang "Keep the Home Fires Burning" with Miss Vail leading the singing.

Rev. E. J. Moritz of St. John's Evangelical church of Mokena offered the invocation and benediction. At the close of the exercises the graves of the soldier dead were decorated with flowers and flags. The Wm. Martin Post members held a special memorial service at the grave of Wm. Martin in the St. Mary cemetery. The post is named in honor of Mr. Martin.

Temperature Over 100 In Shade

Thursday of this week was a record breaker for heat, the thermometer stood at 102 in the shade.

MRS. B. STUDMAN PASSES AWAY

Mrs. Minnie Studman, nee Jarchow died last Sunday afternoon at Joliet at the age of 47 years. She was the daughter of Mrs. Joseph Jarchow.

Surviving are her husband, Ben Studman, her mother, Mrs. Joseph Jarchow, two sisters, Mrs. Henry Pieper and Mrs. Fred Pieper of Joliet; one brother, Walter Jarchow of New Lenox.

Funeral services were held Tuesday at 3 o'clock at St. Peter's Evangelical Lutheran church in Joliet. Burial was in St. Peter's cemetery. Rev. E. W. Trenk officiated. A large number of relatives, from Frankfort attended the funeral services.

Frankfort Pays Tribute to It's Soldier Dead

The Memorial Day exercises held at Frankfort drew a very big attendance. The exercises opened with a parade from the school grounds at 1:30 p. m. to the Pleasant Hill cemetery where after a brief service the soldiers graves were decorated.

The order of service at the cemetery was as follows: March "Activity" by Band Prayer, Rev. C. Schellhase Vocal Solo, Arthur Lambrecht Roll Call, Mayor George Haass Address, Rev. G. Gerhold Song by School Taps, by Mr. Wight and Robert Klepper.

Decorating of graves. Following the exercises on the cemetery the parade returned to the school grounds where the major portion of the Memorial Day program was presented. The musical part of the program was furnished by the school children, community singing, vocal solos and by the popular Frankfort school band which is rapidly coming to the front as a musical organization.

The Memorial Day address was given by a native son of Frankfort, Walter Herschbach, present second assistant state's attorney.

Following the exercises lunch was served on the grounds by the Ladies of the M. E. church. Frankfort always shows a real patriotic spirit.

Truck Garden Hit by Frost

Truck farmers in the Lincoln Estates east of Frankfort sustained a heavy loss in the heavy frost which visited this section last week. One gardner lost 5,000 tomato plants. Cabbage plants and other garden plants and corn was nipped by the frost.

Farmers Fear Feed Shortage

The continued drought has raised havoc with pasture lands and the dairy farmers are much concerned as to what they will do for feed.

Some farmers have plenty of silage for now but will be in distress by fall if the present drought continues. Things look bad at present. Crops are threatened and the farmer has plenty of worries of his own.

Royal Neighbors To Hold Bunco

The Tinley Park Royal Neighbor Juveniles will give a public bunco Saturday afternoon at 2 p. m., June 9th at the Community Hall in Tinley Park. Prizes for adults and children. Everyone welcome.

Flower Show and Pirate Fair Coming

A Flower Show and Pirate Fair in the beautiful Tinley Park school auditorium. Can you afford to miss it? Be sure to keep the date in mind, Wednesday, June 20th.

The Pirate Fair is most unique and interesting. The sponsors are sure nothing like it has been seen around here. Complete program next week. Watch this paper.

HOMER'S 91 YEAR OLD VETERAN VOTED FOR ABRAHAM LINCOLN

From the National Tribune, of Washington, D. C. May 17, 1934, comes the following statement regarding Wm. J. Bentley, Homer Civil War veteran:

"Wm. J. Bentley, who was born in Homer, Will County, Illinois on March 28, 1843, has just passed his 91st birthday in the same township in which he was born and with

Turtle Races to Be Attraction At Tinley Park

Saturday and Sunday of this week all roads lead to Tinley Park and several thousand people are expected to visit Tinley Park, the big occasion being the "Turtle Races" to be put on at the Saenger Hall in Tinley Park by the Tinley Park Legion Post No. 615. A big vaudeville show will also be shown.

The races open Saturday night at 8 p. m. daylight saving time and on Sunday afternoon they will open at 2 p. m. There will be 110 turtles in the race, the turtles being sponsored by various business men, organizations, and the Tinley Legion Post. Everyone invited to see this unique sport. A big time for all so come and bring your friends and neighbors.

Worth Youth Is A Prize Winner

Thirteen year old "Bob" McEathron has for two years been helping his father feed a family of eight Tuesday "Bob" won first prize of \$25 in the annual achievement contest for pupils of Cook County schools.

Just graduated from the Worth grade school, Bob said he would use the prize to start in high school. In the past year Bob earned a total of \$258.48 by selling papers in Worth and raising vegetables in a garden project—though the latter the boy said was a food rather than money making proposition.

He also caddied for golfers, was a member of the school patrol, studied piano, had a perfect attendance record, and found time to read 36 books.

County Supt. Aken was also impressed by the way Bob had kept books on his "businesses."

Host of Old Friends Greet Dr. Holland

A well filled auditorium greeted Dr. John W. Holland, famous pastor of the WLS radio church, at the Tinley Park school last Sunday evening. Many old time friends were in the audience and were glad to grasp the hand of the pastor and exchange a few words of greeting with him, as it has been 28 years since he ministered the M. E. flocks in Tinley Park and New Lenox. A large numbers of new comers in the community who had never met the genial doctor before, eagerly told him how they listen to his broadcasts and of the good they derive from them.

Dr. Holland delivered a message full of hope and faith so much and so sorely needed in these troublous times.

Clare Gardner of Tinley Park served as chairman of the gathering. Mr. Gardner and Mr. Brown Campbell sang a duet.

Rev. Charles Hedler, pastor of the Tinley Park M. E. also officiated.

Dr. Holland in addition to his radio work is assistant to the Rev. Thompson, pastor of the Methodist Temple in Chicago.

Bert Fulton, an old time friend of Dr. Holland was instrumental in having him come to Tinley Park.

Buddy Poppy Sale A Big Success

The Buddy Poppy drive put on last Saturday by the Women's Auxiliary of the Wm. Martin Post of the V. F. W. of the Lincoln Estates was a very successful one. Mokena proved to be a very generous poppy buyer and the sister village of Frankfort was also a loyal poppy supporter. The ladies of the auxiliary and the members of the post, are grateful for the generous contributions received.

New Barbershop Opens Saturday

Mokena's new barbershop will be opened Saturday morning of this week in the former Royal Blue store building across from the Rock Island depot. Mr. Evitt is the new barber.

Mokena Ladies Aid To Give Two Plays

The following program will be presented by the Mokena M. E. Ladies Aid at the Mokena school auditorium Friday night, June 1st at 8 p. m. daylight saving time.

Opening number by Farm Bureau Orchestra.

AUNT MAGGIE'S WILL
A comedy in three acts
Cast of Characters

Jane Sott, a practical young person.
Elmira McGovney
Priscilla Parsons, irreproachable.
Lydia Baudry

Bessie Thorn, irresponsible.
Mrs. John Madeline Gray, engaged.
Dorothy Kraus

Willing to be
Minnie Wells
Myrtle Roberts
Julia Watson
Velma Klose

Henrietta Clark
Francis Sorenson
May Bell
Mrs. Viola Hostert

Mrs. Simms, a competent housekeeper from Alpine
Eloise Balaz
Delia, an incompetent one from Ireland
Mrs. Clevenger

Act 1 A room in the house of Bessie Thorn.
Act 2 The dining room in Madeline's apartment.

Act 3 One year later again in Madeline's apartment.
Dance—ALICE BLUE GOWN
Bernice Muehler, soloist.

Genevieve Pfleger, Grace Moriarty, Lydia Baudry, Eleanor Hall, dancers. Miss Vail, accompanist.
Selection by orchestra.

THE RED LAMP
A play in two acts
Cast of Characters

Matilda Deering, a rich spinster.
Minnie Nebeker
Harold Deering, her nephew
Bristol Lauffer

Alice Deering, Harold's sister.
Dolly Meyers
Archie Clarke, a young lawyer
Erwin McGovney

Bill Worth, a man of all trades.
Mr. John Annie O'Shane, maid at the Deering's.
Mrs. Hensel

Act 1 Living room in the Deering house, in a suburb of New York.
Act 2 The same five minutes later.

The Time An evening of the present.
The community is cordially invited to come and enjoy the evening.

Crestwood Fire Fans Dance Big Success

The dance given by the Fire Fans Club of Crestwood at the Clarke barn at 147th and Cicero avenue last Saturday night was a humdinger and every one had a swell time.

Orland Center School Closes

On Tuesday, May 29th the Orland Center school in District 136 closed its school year with commencement exercises for Elmer Edward Roemer, who is Achievement graduate.

Miss Kathryn Innes, the teacher, arranged a recital of songs by the prize chorus and of poems by Robert Louis Stevenson. There was also a short service in honor of Memorial day. Mr. Harvey Cooper, president of the school board, presented Elmer's diploma. The guests were delighted with the performance of Mrs. J. Graham Houston, reader, and Miss Francis Marlowe, pianist, both talented artists from Chicago.

After the program some forty people played cards and bunco, while having refreshments.

M. KETTERING DIES AT SISTER'S HOME, ORLAND

Maurice A. Kettering, aged 57 years, died May 24th in the home of his sister, Mrs. David Agate in Orland township.

Mr. Kettering was born in Le-mont township, December 13, 1876. He lived in the same community all his life. He lived a very simple life and was loved and respected by all who knew him.

Surviving are three sisters, Mrs. Thos. Ludwig, Lemont; Mrs. David Agate, Orland and Mrs. Charles Angier of Beardstown; four brothers, Clarence, Loyd, Elmer and Harold, all of Millette, South Dakota.

Funeral services were held in the Orland Park M. E. church Sunday afternoon, with burial in the Brooks cemetery.

Called to Minn., By Grandmother's Death

Miss Elizabeth Krusemark, teacher in the Mokena public school received a message Wednesday telling of the death of her grandmother, Mrs. Mary Krusemark in Truman, Minn. Miss Krusemark left for Truman Thursday and will not return to Mokena until next Fall.

Dedicate Flag Pole

The Orland Park Legion Post in addition to celebrating Memorial Day also dedicated the new flag pole and flag in the Civic Center across from the Wabash depot.

FLAME of the BORDER

A vivid Western tale of romance and border intrigue which will appear in this paper... Do not fail to read it.

VINGIE E. ROE
(Mrs. Raymond C. Lawton), author of this thrilling story which has its setting on the borderline between Arizona and Old Mexico, knows her West from a lifetime spent in that land which still holds much of the romance of the earlier frontier days. She was born in Kansas but has lived at various points in the West and Southwest and now resides at Napa, Calif.

Among the western stories, in addition to "Flame of the Border," which have placed her in the front rank of present-day fiction writers, are "Nameless River," "Primal Lure" and "Heart of Night Wind."

This author has never written a better story than "Flame of the Border." Read it as it is published serially in these columns.

The Conquering Spirit

The true American spirit that will not be downed is what led us into those wars from which we came forth the victors. Because everything has a price, and victory perhaps the greatest of all, we lost thousands of men who fought for our cause. It is to them that we go on Memorial Day bearing flowers as tribute. We honor these men who have preserved our United States.

ITALIAN VILLAGE

By ELMO SCOTT WATSON

HERE'S a call out for the woman who writes all those travel books which have been published from time to time under the title of "So You're Going to" (the blank space being for the name of some foreign country). If she wants to do it, she can write a combination volume which will be a guide book to more than a dozen of them and the title of it might well be "So You're Going to Chicago."

Which is by way of saying that this summer thousands of Americans are "going abroad at home" by visiting the second edition of the big show which the middle western metropolis put on last summer. For the outstanding feature of the 1934 Century of Progress exposition is the foreign villages which now stand on the shores of Lake Michigan. Unlike other world's fairs where you got your idea of what a certain foreign country was like by inspecting a formal "exhibit" of some of the products, handicraft, etc., of that land, this year's exposition in Chicago offers you a "grand tour" of four continents concentrated in less space than a township in your home county, where in the transplanted bits of more than a dozen foreign lands you can hobnob with their people and breathe in the very atmosphere of their everyday life.

Of the four continents represented by villages at the fair, Europe has the greatest number. A visit to the English village is more than a trip across the Atlantic to call on our British cousins. It means also a journey back into the past—to that Merrie England of the Sixteenth century made glamorous by the writings of several immortals who lived then. For over here is the cottage of Ann Hathaway, to which more than once across the fields of Stratford-on-Avon came her sweetheart, young Will Shakespeare, as yet unconscious of the fame that was to be his. There is a replica of Haddon Hall, home of the lovely Dorothy Vernon, whose tempestuous career was rescued from the obscurity of history in the pages of Charles Major's "When Knighthood Was in Flower." And not far away is the replica of Stoke Pogis church where Gray wrote his "Elegy in a Country Churchyard" and another of Sulgrave Manor, ancestral home of the Washingtons.

To leave England and go to Ireland does not involve a trip across the stormy Irish sea. Instead a minute's walk up the Midway takes the "tourist" back to the "ould sod"—a village of more than a score of buildings ranging from the simplest thatched cottage to a replica of Tara's hall, famed in song and story as the meeting place of the ancient Irish kings, clergymen, princesses and bards.

Walk across the street from this historic palace (Watch out! That jaunting car just barely missed you!) and you'll find yourself in Dinty Moore's Pub, one of the most famous bars of Dublin, with its sawdust covered floor and rough wooden benches. As you drink a toast to the spirit of the Emerald Isle there drifts in through the windows the sounds of music and you hurry out to join the throng gathering in the village green where a group of jolly Irish lads and colleens are dancing fligs and reels to the accompaniment of bagpipe and harp.

Or if you're a serious-minded "tourist" and haven't time to waste on watching such frivolities, over there is a group of weavers demonstrating the manufacture of Irish linen, poplin and lace, and in another place you can try to decipher the Latin text of the Book of Kells, the illuminated copy of the Gospel, said to be the finest example of early Christian art of its kind, and containing also local Irish records dating back to the Eighth century.

So you depart from the British Isles and five minutes later you're in Holland—in the land of Dutch windmills and dykes and canals and tulips. "Where are you going, my pretty maid?" you ask that rosy-cheeked girl as she clatters along the cobbled street in her wooden shoes, swinging a pail on her arm. "I'm going a-milking, sir," she may or may not reply. But anyway if you follow her, you'll see a Dutch farm house with its immaculately kept cow-stable, opening into family living quarters, with its tiled mangers and other furnishings that would not be out of place in a modern American home.

But don't spend too much time here in Queen Wilhelmina's land, for you're due over in the Black Forest of Germany, in a village called the "Schwarzwald Dorf." There, no matter how blazing the sun may be on the Midway, you'll find mid-winter weather and you'll enjoy the novel experience of outdoor ice skating in the middle of summer. Against a background of synthetic-snow-covered mountains (they were built to order and contain more than 15 tons of steel, 90,000 feet of lumber and 2,000 yards of plaster) you'll see typical German houses, their roofs mantled with snow (synthetic) and with icicles (also synthetic) hanging from their eaves.

Over there you see—but the little door on that cuckoo clock hanging on the wall has flown open and the cuckoo is telling you that it's time to resume your "tour" to that Swiss village that nestles at the foot of the snow-covered Alps (synthetic, of course). That clear, high-pitched call you hear as you enter is a Swiss yodeler saluting his native mountains (for, in truth, the illusion of these man-made Alps is almost perfect).

If you're tired of snow and high mountains by this time, in a minute or two you can be in sunny Italy. You enter it through a replica of the entrance gate to the little town of Signa. But once inside the village you find it's more than one Italian town. Here is a replica of the leaning garrison tower of Bologna. Over there is the home of Christopher Columbus in Genoa. You cross the Piazza Benito Mussolini and walk up and down the Via Marconi and the Via Cristoforo Colombo which flank the square. You visit the ancient Roman temple of Apollo and back of that you stand on a balustraded piazza overlooking the Courtile Italo Balbo.

A short steamer voyage on the Mediterranean (in fancy) and you're in Spain where you wander through the halls of the famous Poblet monastery which dates back to the Eleventh century and houses the famous Virgin of Pilar. You inspect other historic castles and buildings from the six most famous provinces of Spain and again you take ship for another voyage on the Mediterranean (a "magic carpet" one, of course).

This time Africa is your goal—there to visit the Oasis, a Mediterranean village of North Africa, or the Tunisian village peopled by Arab sheiks, Bedouin tribesmen and African craftsmen demonstrating their arts and handicraft. From Africa the "tourist" heads next for Asia, for the Streets of Shanghai, a colorful reproduction of one section of that international Chinese port. Pagoda towers, eight stories high and painted in brilliant hues, mark the entrance to a colony of typical Chinese buildings, including a Confucian temple, a theater, an art gallery, shops and restaurants.

It would take you weeks to make your way across the Pacific ocean from China to Mexico if you were a real tourist. But as a "tourist" at the world's fair it is only a few minutes walk from the Streets of Shanghai to the Mexican village, with its replicas of the Acatapex church, the Amecameca chapel and the cathedral of Quernavaca. But don't let the easy-going, "noco tiempo" atmosphere hold you in its spell too long. It's almost time to end your "world tour"

That Body of Yours

By

JAMES W. BARTON, M. D.

Burns and Scalds

WHEN we think of all the people who have died following severe burns and know that now we are in possession of a form of treatment which prevents this terrible loss of life, we are indeed grateful.

You will remember that previous to 1928, from 15 to 40 per cent of those with severe burns died, whereas, now the death rate is about 4 per cent.

This is due to the treatment of burns by tannic acid.

Dr. P. H. Mitchener, London, tells us that during the period from 1929 to the present time, when tannic acid compresses have been used as the routine outpatient treatment for all burns and scalds, no deaths have occurred among the slighter cases, which average 800 a year, and of which about one-third are children under ten years of age.

The treatment of burns and scalds following proper cleansing of the damaged part, aims at lessening collapse by stopping the absorption into the blood of the substances which usually cause collapse and death in from 12 to 48 hours after the burn.

The treatment also aims at lessening the amount of fluid from the burned part which is often so serious and so often fatal in the first six to 12 hours.

Another aim is to prevent poisoning of the system from the harmful material on the burned surface, as this may cause bronchopneumonia and death in from five to 12 days.

Doctor Mitchener keeps on hand a stock solution of 2 per cent tannic acid and 1 to 2,000 bichloride of mercury.

In homes or shops where burns are not so frequent he compounded a tablet containing 17½ grains of tannic acid, ½ grain bichloride of mercury, and 1 grain of boric acid, which tablet dissolved in two ounces of water gives a solution of the necessary strength though slightly muddy in appearance. It can be used equally well for spraying when this method is preferred.

If there is no tannic acid available, strong tea poured over the burn has given good results.

The relief from suffering and the saving of precious lives by this tannic acid treatment certainly gives cause for thankfulness.

Don't Force the Child to Eat

IT is only natural that parents should like to see their children eat, because they know that growth and development come from eating. To make sure that the child gets enough food, large meals at the regular eating time and an extra "bite" in the mid-morning and mid-afternoon is often given.

However, it is just here that some parents may be making a mistake, as the most important point is not the amount or quality of the food eaten, but the appetite, the natural appetite of the child.

Dr. A. C. Glipson, Gadsden, Ala., points out that since hunger is the natural stimulus under which appetite develops, it follows that all things which increase or decrease the feeling of hunger naturally increase or decrease the appetite. Therefore, methods should be used that will help to empty the stomach in a short time so that the youngster will be hungry by meal time.

This means that too much food should not be eaten at one time, and foods that remain too long in the stomach should not be used. Thus, foods rich in fat, pass out of the stomach slowly.

All fried foods and nuts remain a long time in the stomach and should therefore be avoided where an appetite needs development.

Milk also, although a fluid, is one of the foods most slowly to be passed out of the stomach. Thus the mid-morning glass of milk which is so helpful in building up most children may therefore be a bad thing for a child with a poor appetite.

Large amounts of sweets and starchy foods tend to destroy the appetite. Meats, broths, and especially meat extracts stimulate the appetite and are therefore used in the first part of the meal.

The meals should be spread as far apart as possible. The way the first attack of loss of appetite is treated is most important, if further attacks are to be prevented. On the first attack of refusal of food, the amount should be reduced instead of increased, to allow the child to develop hunger, as hunger stimulates appetite.

The whole thought then is not to try to force food into the youngster, but to try to develop a natural appetite.

Settlers Called Coureurs

Many of the earliest settlers of Ohio were what the French called Coureurs, or outlaws. The Canadian fur trade early fell into the hands of companies organized and chartered in France, and only members of these companies, or those to whom they gave permission, could trade in hides. Hence, to make a living by engaging in the beaver trade with the Indians, many Canadian settlers forsook their homes and families and took to the wilderness to the west. They were later driven onward by regular traders and officials, and finally vanished in the prairies and mountains of the Far West.

POULTRY

EARLY SEPARATION URGED FOR CHICKS

Experiment Station Expert Favors Segregation.

By Prof. W. C. Thompson, Poultry Husbandman, Rutgers University, N. J.

A great advantage to the poultryman will result if his birds are separated as to their inherited trait of early, medium or late maturity.

Students of poultry breed improvement have found ample evidence to indicate that the best producers for the pullet-year, other things being equal, are the individuals which start laying early.

For Leghorns, this would be between 150 and 175 days of age. Such birds are precocious layers. In every hatch of chicks this spring there will be some individuals among the young pullets which will be precocious. There will be some which will not come into laying maturity until from 175 to 200 days of age, and there will be still others which are decidedly late maturing.

In preparation for such a basis of selection, every hatch of chicks should be toe-marked in such a manner that the date of hatch for every pullet will always be known. One hatch for example, might be marked with an outside left toe-mark; another hatch with an inside left toe-mark, and later hatches with other identifying toe-marks.

Keep Turkeys Away From

Chickens, Specialist Says

Blackhead is one of the most serious ailments affecting turkeys, and one of the most common means for spread of this parasite is through chickens. Hence, larger turkey raisers of the state now make it a practice to keep the two kinds of fowl always separated, so that they cannot be on the same ground.

The name is a misnomer, C. M. Ferguson, state poultry specialist, says, for it has nothing to do with the head. It is evident in the bird by spots on the liver and by inflammation of the blind intestine. It causes heavy toll when it starts in a flock, and as yet no known cure has been announced.

Sanitation is the best preventive, along with isolation from chickens. The same organism is found in chickens but seldom causes death in them. The "Billings" method, developed in Montana, is now a common method of rearing poults. This consists in raising the young turkeys on fresh ground, and again fencing off a space on one side of the house. After two months the birds are past the danger period, and then yards are rotated every month.—Ohio Farmer.

Scots Grey and Dimpie

Scotland has two breeds of poultry which may rightly be termed national and both, as might be guessed, by anyone understanding the practical Scotch, are hardy and useful. One is the Scots Grey and the other the Scots Dimpie. The latter fowls are so short-legged as to give them the appearance of being "creepers." That the Scots Grey has considerable antiquity as a breed is evidenced by the fact that the Scots Grey Specialty club, founded in Scotland in 1885, has traced it back for more than 150 years. Throughout the years the breed seems to have been noted for laying and table qualities combined with the hardiness necessary for their native climate.

Poultry in Pastures

Wherever there is pasture for cows there is range for poultry. Fowls and chickens in a cow pasture keep it in better condition than when only cattle are running in it. Their own droppings are the best known fertilizer for grass. They spread the manure less evenly deposited by other stock. They destroy flies and other insects which annoy cows and horses at pasture. The farmer or dairyman who keeps what hens and chickens can be handled advantageously with his cows need not send more milk to market than can be sold at the established price.

New-Laid Eggs Important

New-laid eggs are the secret of successful hatches. Although hatching eggs are often kept for a considerable period before beginning their incubation, it is well known that a successful hatch is doubtful if they are more than ten days old and that two weeks should ordinarily be the limit. When held for several days the eggs should be turned daily. Eggs for hatching when shipped from a distance are generally held for 24 hours before "setting."

Slipped Tendons in Chicks

A condition known as slipped tendons is often found in chicks raised in battery brooders. It usually makes its appearance when the chicks are from four to seven weeks of age. The symptoms of slipped tendons are swollen hocks that assume a bluish-green color. The tendons slip out of place on either side of the hock, which often renders one or both legs useless. This trouble seems to be due entirely to defects in the ration.—Wallaces Farmer.

News Nuggets From Illinois

The Montgomery county emergency relief office in Hillsboro was ordered closed for two weeks because of demonstrations and threatened violence by the county's idle.

Fulton county is out of debt, according to a report made by County Treasurer L. F. Lillie, who announced that with the exception of current bills, all sums due had been paid, including balances on tax anticipation warrants. More than \$50,000 has been paid in taxes so far this year.

The marriage of Margaret Clower and Ira L. Vancil, Taylorville, has been kept secret for ten years. It was revealed when Mrs. Vancil had to sign an administrator's bond.

John Shelton, ninety-five, the oldest Confederate veteran in southern Illinois, died in Carbondale and was buried at Mayfield, Ky.

Mrs. E. W. Williams, cousin and one of the last near relatives of Gen. John A. Logan, of Civil war fame, died in Carbondale.

Silas H. Altorfer of Peoria, fifty, president of the A. B. C. Washing Machine company, died after a short illness.

Floyd Arundale of Morris, forty-six years old, a bachelor, shot himself through the heart with a shotgun.

E. J. Hinz, former Rockford city treasurer, interrupted the opening of his trial in connection with a shortage of \$12,330 in his accounts to plead guilty to four counts in the indictment. By agreement of State's Attorney Robert E. Nash, a fifth count, which charged embezzlement, was quashed. Hinz's guilty plea applied to the four counts which charged him with withholding public funds. His attorney immediately filed a petition for probation.

Anton Kumpik, twenty-three years old, of Aurora, was killed and two other persons were injured in a collision between two automobiles at the boundary of Lyons and Forest View.

George H. Deems of Springfield, fifty, sustained serious burns when natural gas, accumulated in the basement of his home, was ignited, blasting the house from its foundation.

The bureau of the census in a preliminary report just made public has covered the operations of 16,342 political units of the state of Illinois. Total costs of those units for the fiscal year, which ended June 30, 1932, aggregated \$502,354,788, or \$76.46 per person.

Vincent Okaren, twenty, implicated with two other youths in the slaying of John A. Ball, Dana grocer, and threatened with lynching, slipped from his handcuffs and escaped by running through a field. The three, who had been spirited away from a crowd which threatened to lynch them, were being taken from an inquest into the slaying at Minonk to Ottawa.

Edwin Marzuki, seven years old, son of Mr. and Mrs. Donie Marzuki of Aurora, died from burns received when his clothing caught fire while he was playing with matches. Mrs. Marzuki was seriously burned about the hands trying to save her boy.

Mr. and Mrs. Frank R. Ehrman of Forrest celebrated their fiftieth wedding anniversary.

Governor Horner congratulated the legislature upon passage of the state NRA compliance bill which was approved by the senate after going through the house and which he signed. The governor was opposed by the Republican minorities and by business organizations in his efforts to pass the bill sent him by the brain trust in Washington. "The state NRA bill is nothing to be feared," the governor said. "It should be applauded by those who are working for general recovery. It does not endanger state sovereignty. It does not subject the small business people of Illinois, nor the larger ones, either, to any regulation or control to which they are not now obedient. Business and industry of Illinois will benefit and prosper with this law on the state statute books. The state does not intend to interfere in the legitimate private conduct of business, large or small. Enforcement of this law merely sets up additional machinery to lawfully and properly help industry regulate itself as it is now doing. The adoption of this measure opens the courts of Illinois to its citizens in greater degree than heretofore. It provides tribunals in this state for the convenience of the people so that anyone charged with violating the NRA may have quick trial before a court in his own community and a jury of his neighbors. The law, voicing the co-operation of Illinois with the nation, sets up safeguards which protect the people fully and completely. Before any prosecutions to enforce the NRA are brought in the courts of Illinois the attorney general's sanction is required. The law does not in any way jeopardize the validity or suspend the operation of existing Illinois statutes."

The state of Illinois can build a hard road for beauty as well as for service, Circuit Judge Walter W. Wright ruled in Springfield. Judge Wright denied a motion for a permanent injunction to restrain the state from building a proposed road in Hancock county along the Mississippi bluffs.

Col. Edward J. Blair of Oak Park resigned as work relief administrator for the Illinois Emergency Relief commission. He explained that the pressure of private business required all of his time. He had served without compensation.

Lesson for June 3

JESUS IN THE SHADOW OF THE CROSS

LESSON TEXT—Matthew 26:31-46.
GOLDEN TEXT—And he went a little farther, and fell on his face, and prayed, saying, O my Father, if it be possible, let this cup pass from me; nevertheless not as I will, but as thou wilt, Matthew 26:39.

PRIMARY TOPIC—Jesus Praying.
JUNIOR TOPIC—Jesus in Gethsemane.
INTERMEDIATE AND SENIOR TOPIC—Jesus Praying in the Garden.
YOUNG PEOPLE AND ADULT TOPIC—Gethsemane.

I. Plotting the Death of Jesus (vv. 1-5).

Jesus, with divine insight, predicted not only the fact of his death but its time and manner. He was not taken by surprise since for this pre-emptive purpose he came into the world (Heb. 2:14). He deliberately walked up to death. He knew that the Passover would find its fulfillment in his death, for he was the antitypical lamb thereof. The Jewish authorities in secret conclave were plotting to silence his voice by putting him to death. It was the divine purpose that he die.

II. Mary of Bethany Anoints Jesus (vv. 6-13).

1. The place of the act (vv. 6, 7). This anointing occurred when Jesus was at meat in Simon's house. She brought a precious possession and lavished it upon her Master.

2. The indignation of the disciples (vv. 8, 9). The action of the disciples was in strange contrast with Mary's love. The real thing that hurt Jesus was the loss of the money for which the ointment might have been sold; not that he cared for the poor (John 12:5, 6).

3. Mary defended by Christ (vv. 10-13). Jesus could not allow his most appreciative disciple to lie under this curse so he came to her rescue. In spite of their criticism, he had nothing but the highest praise for her deed. As a result of Christ's defense, Jesus is so stung by rebuke that he hastens away to betray his Lord.

4. The meaning of this act (vv. 12, 13). By sitting at Jesus' feet in loving fellowship, she obtained a grasp of truth which none of the other disciples had. She saw that his body was to be broken and that his precious life was to go out. She entered into fellowship with his sufferings and the joys of his resurrection. This she showed in the symbolic act of lavishing her most precious possession upon him. She did this service in loving anticipation.

III. Jesus Betrayed (vv. 14-30).

1. The bargain of betrayal (vv. 14-16). Satan had so complete a mastery over Judas that he sold his Lord for the price of a slave (Exod. 21:32).

2. The betrayal announced (vv. 17-30). This took place while they were eating the Passover. It may be that the reason for this announcement at this time was to afford Judas a last opportunity to repent. Jesus' words, "He that dipeth his hand with me in the dish the same shall betray me," revealed the darkness of this crime.

IV. The Disciples Warned (vv. 31-35). This took place as they walked from the upper room to the Garden of Gethsemane. He plainly told them, "All ye shall be offended because of me this night," quoting Zechariah 13:7 as proof. Peter vehemently protested that although all should forsake him, he would not. How little Peter knew of his weakness. His self-confidence was his snare.

V. Jesus Praying (vv. 36-46).

1. The place—the Garden of Gethsemane (v. 36). Gethsemane means "oil press." It was a place some three-quarters of a mile east of Jerusalem where oil was crushed out of the olives.

2. His companions (v. 37). Peter, James, and John, who had been with him on the Mount of Transfiguration, are permitted to go with him in the deep shadow of the garden.

3. Jesus sorrowing even unto death (vv. 37, 38). The cause of his suffering was not primarily physical but spiritual. He was being made sin for us (II Cor. 5:21).

4. The prayer itself (v. 39). "O my Father, if it be possible, let this cup pass from me." What was this cup? It was not a prayer to be delivered from the cross. The idea that he desired to escape from the cross and thus stop short all his redemptive work is not to be entertained. Redemption through the sacrifice of himself was the supreme purpose of his coming into the world. The holiness and perfection of his nature moved him to shrink from the mountain of sin which was resting upon him. Though the cup was bitter he bowed in submission to the Father's will.

Following a Star

The secret of the perseverance of the wise men is not hard to find. It sprang from this, that they were following a star. Had they been guided by anything less than that, they would have sunk down wearied long ago.

Fear of Conscience

Many a man has in his past life some deed hidden which, if it became known, would drive him from society, because it would bring down on him the reprobation of the conscience of all who knew him.

Interesting Point in

Ascertaining Real Age

Dr. Serge Voronoff, the eminent gland specialist, is credited with the belief that he has perfected a method of physical examination which will establish one's exact age. Apparently it is not the method used with a tree, of sawing through the trunk and counting the rings, for Zoro Agha, the ancient Turk, has consented to undergo it, or so the United Press has reported from Istanbul.

It will be interesting to learn the result of the examination. Zoro Agha, it may be remembered, came to this country four years ago as a subsidized exhibit of what total abstinence did for a person.

A different recipe for longevity was that of Mrs. Belle Rhynes, of Savannah, Ga., who died a short time ago at the reputed age of one hundred and twenty-three years. She attributed her survival to the fact that she had smoked a pipe since she was eleven years old. Somewhat along the same line was the testimony of Peter Pollen, of Trinidad, who celebrated his one hundredth birthday by diving into a rushing stream and swimming thirty-five yards under water. In the tropics, he advised, drink rum and smoke a pipe.

If only Doctor Voronoff's test might determine scientifically not only how old such human antiquities were, but why, it would spare us many a controversy.—Literary Digest.

Some Men!

A man recently sought divorce because his wife refused to talk to him. Some men haven't enough sense to leave well enough alone.—Washington Star.

Face "Broken Out?"

First wash with pure Resinol Soap. Then relieve and improve your skin with soothing spots with soothing

Resinol

MATHEMATICAL WONDER

A doctor at an asylum at Nantes, France, discovered among his patients a "lightning calculator," who, although he could scarcely read and could not write, solved mental arithmetic problems involving large numbers. Asked, "How many seconds there are in thirty-nine years, three months and twelve hours?" he gave the correct answer in thirty-two seconds. Explaining how he calculated the number of seconds in thirty years, he said: "I know by heart that there are 31,536,000 seconds in a year. I multiply 30,000,000 by 30, which gives me 900,000,000. Then I multiply 1,500,000 by 30, and get 45,000,000; 30,000 by 30, which gives 900,000, and 6,000 by 30, giving 180,000. I add all these products and get 946,080,000 seconds in thirty years." This answer was given in fourteen seconds.

Week's Supply of Postum Free

Read the offer made by the Postum Company in another part of this paper. They will send a full week's supply of health giving Postum free to anyone who writes for it.—Adv.

Radios on Snowplows

To facilitate communication with stations and trains on the government railways, radio receiving sets were installed on snowplows at work in various parts of Japan during heavy snowfalls. They were found highly efficient in assisting traffic.

**KILLS
ANTS**

Sprinkle Ant Food along window sills, doors and openings through which ants come and go. Guaranteed to rid quickly. Used in a million homes. Inexpensive. At your druggist's.

**PETERMAN'S
ANT FOOD**

TURKEY'S "MODERN" TURN

Modernization of Turkey under the regime of Kemal Pasha is not an unmixed blessing so far as the situation of Turkish husbands is concerned, judging from a report from Ankara found in a Vienna paper. According to prison statistics quoted in the message from the Turkish capital, more than 50 per cent of about 700 women in the jails of the republic are there for having murdered their one-time matrimonial partners. Just why the "emancipated" wives should make such gruesome use of their newfound freedom is not explained in the report.

He Might, but—

Einstein celebrated his fifty-fifth birthday by filling out his first American income tax return. That would be a great mathematician's idea of making whoopee.—The New Yorker.

This Girl Knows..

YOU CAN
DEPEND ON NR
IT'S ALL-VEGETABLE
SAFE!

**Bright Eyes...
No Bad Skin**

She learned long ago how often dull eyes, pimply skin, nervousness and lack of pep come from bowel sluggishness and constipation. Now NR (Nature's Remedy) is her secret of sparkling loveliness and vital health. No more ineffective partial relief for her—all-vegetable NR Tablets give thorough cleansing, gently stimulating the entire bowel. Millions take NR for thorough, effective relief from constipation and biliousness. Get a 25c box.

NR TO-NIGHT
TOMORROW ALRIGHT

"TUMS" Quick relief for acid indigestion, heartburn. Only 10c.

Firestone LEADERSHIP

"The Ultimate Test of Leadership is Performance"

FIRESTONE maintains its leadership in tire development by producing a new tire for 1934 with a wider tread, flatter contour, deeper non-skid, greater thickness, and more and tougher rubber, which gives greater non-skid safety, more traction, greater blowout protection, and more than 50% longer non-skid mileage.

These achievements are made practical by the Firestone patented process of Gum-Dipping, providing greater adhesion between the plies of the high stretch cords and between the Gum-Dipped body of the tire and the tough, massive non-skid tread. It also provides greater strength, longer flexing life, and greater protection against blowouts.

Gum-Dipping made it possible for Firestone to design, develop and put on the market the first successful balloon tire in 1923. This tire was the pattern used by all others and completely revolutionized the tire industry and set new standards for the automobile industry.

For fourteen years leading race drivers have driven to victory on Firestone tires, built with Gum-Dipped high stretch cords. They have trusted their lives to Firestone Leadership—as they know that the patented Firestone construction features provide them with greater safety—longer mileage—and greater blowout protection.

Have your Firestone Dealer or Service Store replace your smooth dangerous tires with the new Firestone High Speed Tires for 1934.

Listen to Lawrence Tibbett or Richard Crooks and Harvey Firestone, Jr., every Monday night—N. B. C. Network

THE NEW Firestone AIR BALLOON FOR 1934

The new Firestone Air Balloon for 1934 embodies all the improvements in the new Firestone High Speed Tire. The lower air pressure provides maximum traction and riding comfort. Gum-Dipping safety-locks the cords, providing 30 to 40% greater deflection and blowout protection.

Get 1935 low swung style by equipping your car today with these new tires and wheels in colors to match your car. See your local Firestone Dealer or Service Store for a FREE DEMONSTRATION.

Firestone Tires are Track Tested on the greatest proving ground in the world—The Indianapolis Speedway.

Firestone Tires are ROAD TESTED on the large fleet of Firestone test cars, day and night every day in the year, over all kinds of roads and highways.

FRANKFORT

The following commencement ex-
ercises were held May 31 in the Se-
dan Prairie public school of which
W. R. Hollstein of Frankfort is the
teacher:

Opening song, Springtime, School
Invocation, Rev. C. F. Schellhase
Salutatory, Alda May Harms.
Class History, Harold Stege
Class Prophecy, Elaine Henke
Class Doctor, Arthur Kampe
Duett "Roses are Blooming"
Alda May Harms and Lucile Bode.
Guitar selections, Blue Hours,
Aloha Oe, Elaine Henke.
Piano Solo, Spinning Song, Ber-
nilda Stuckey.

Guitar selection, "Pictures of My
Mother", Arthur Kampe.
Address, Rev. C. F. Schellhase
Presentation of Diplomas, Miss Mc-
Claghry, director of education.
Remarks, W. R. Hollstein, prin.
Song, "You Can Smile" School
Class Play, "The Adoption of Bob"
Vaudeictory, "As We Leave" Ber-
nilda Stuckey.

Song, "Farewell Schoolmate" Class
Benediction, Rev. C. F. Schellhase

The following commencement
program will be presented by the
Frankfort Public School on Friday
night, June 1st:
Processional, Eva Jean Pfaff
Song "At the Crossroad" Class
Invocation, Rev. G. Gerhold
Salutatory, "We say It With
Smiles", June Pfaff.
Selection "Soldier's Farewell" by
orchestra.
Class Portrait and Prophecy, Violet
Lorenzen.

Selection "Straussiana" Orchest-
ra.
Playlet "The Top of the World"
Cornet Solo, Robert Klepper
Class Oration, Roy Pfeifer
Class History, Ralph Nieland
Vocal Solo "Take Me Out and
Lose Me" June Pfaff.
Key Presentation to Seventh
Grade, Elvira Genens.
Response to Key Presentation,
Leta McArthur.

Address, Rev. C. F. Schellhase
Presentation of Diplomas, A. J.
Heuser.
Vaudeictory "A Farewell" Violet
Lorenzen.
Benediction, Rev. G. Gerhold
Last Sunday Rev. and Mrs. G.
Gerhold, A. H. Krusemark, William
Wischhover and a number of
other Frankfort folks attended the
baccalaureate exercises of the Joliet
High School.

FOR GOOD RESULTS

ADVERTISE IN THIS PAPER

MOKENA

Mr. and Mrs. Ryther arrived here
the later part of last week from
Texas and are staying with the lat-
ter's sister, Mrs. Lizzie Moriarty.
Mrs. Ryther is recovering from a
recent stroke.

Jack Christensen who has been
in Arizona and New York, has re-
turned to Mokena.

The annual commencement ex-
ercises of the Mokena public school
will be held in the school auditor-
ium June 6th at 8 p. m. The fol-
lowing high school students will
graduate:

Lydia M. Baudry, Marie E.
Bruhn, Ethel M. Devlin, Chester D.
Ebert, Eleanor V. Hall, May L.
Helmke, Edward L. Laufer, George
Dodd, Laufer, Walter M. Miskavitz
Bernice F. Muehler, Francis J. Rin-
ke, Gertrude I. Sippel.
The class motto is: "Out of
School Life Into Life's School."

The class colors are silver and
blue and the class flower is the
Lily of the Valley.

The Sophomore Class of the Mo-
kena High School will present a
play "Mother Mine" at the school
auditorium on Monday evening
June 4 at 8 p. m. daylight saving
time.

Charles Moore has improved his
property on Front street with a
new coat of paint.

Mr. and Mrs. Clyde Knudson of
Chicago spent Sunday with the
former's parents, Mr. and Mrs.
George Knudson.

The Mokena village board will

meet next Tuesday night, June 5.

The leaking riser pipe and bot-
tom of the village water tower has
been repaired and a new freeze
box placed about the riser pipe.

A new concrete platform and new
pump have been placed on the vil-
lage well near the Rock Island de-
pot this week.

Work on dismantling the old
school house is going on. The lum-
ber is to be used in the construction
of two bungalows by Byron Nelson
and Lester Schiek.

MOKENA ACES WIN 3rd GAME

The Mokena Aces won their 3rd
game of the season Sunday, May
27th, beating the Joliet Atlas Tires
7 to 4.

Mokena played a good game with

all the boys playing a good game.
The hitting honors went to McGov-
ney, and Homerding, getting three
aniece. With Cappel nitching a se-
ven hit game and striking out nine
men. This was one of the supposed-
ly good teams in this section, but
Mokena took them over with no
trouble at all. This brings Mokena
standing up 3 to win and no losses.
Cappel was relieved by Homerding
in the ninth inning.

On Memorial Day the Mokena
Aces played the Mokena Married
Men and defeated the latter 16 to
3. Any fast teams desiring to book
games with the Mokena Aces Call

A group of additional new models
for the 1934 Chevrolet line—four
full-size cars—100% Chevrolet in
quality and reliability

RIGHT at the peak of Chevrolet popularity—with
nationwide demand sending production to new
all-time "highs"—Chevrolet dealers are displaying an
additional group of four new models. These cars are
identical in quality with all 1934 Chevrolets. And the
prices have been set at such incredibly low figures that
you can now buy a Chevrolet for \$490! "A Chevrolet
for \$490!" That's the world's lowest price for a six-
cylinder car. And a figure that sounds even more
impressive after you find out what it buys: A great
big, full-size, long-wheelbase car. A cushion-balanced
SIX of surprising smoothness, power, snap and dash.
The most economical full-size car that money can buy.
And every closed model has a Body by Fisher. Nobody
interested in motor cars can afford to let another day
slip by, without seeing this "Chevrolet for \$490."

Before you order fuel

Get the facts about low-cost Gas Heat!

To prove that every home can now afford to heat with gas, we'll install it at our expense... remove it at our expense, if you don't like it.

It's wise to look ahead, prepare for the winter but be certain that you take the right step. Before you order fuel, it will pay you to investigate thoroughly the possibility of automatic gas heat in your home. There's no need to put up with the muss and fuss of furnace drudgery when rates for gas heat are now so low. Think of it! The cost of gas for heating is now one-half of what it was during the 1930-31 heating season.

You invest nothing for equipment. And, best of all, you can try gas heat in your home without investing one cent for equipment. This startling trial offer is made because we have confidence in the perfection of gas heat. We know that it will bring you so much comfort, convenience and happiness that, once you have tried it, you'll never go back to the old method. 20,000 families in the Chicago area accepted our proposition and are now enjoying automatic gas heat.

Our trial proposition

To prove that every home can now afford to heat with gas, we'll install it in your present furnace or boiler at our expense. You can try it one month, two months, a year. If within the first year you find you don't like gas heat, we'll remove it at our expense and replace your former heating equipment in good workmanlike order. While you are trying gas heat, you pay only \$3 a month rental on the equipment in the average home, for the nine heating months. When you decide to keep gas heat, the rental you have paid applies on the purchase price of the equipment. The rental charge is

included with the bill for the gas you use. When the weather is changeable, there's no fire building with gas heat. It's automatic, and a little thermostat on the wall keeps the temperature exactly as you want it.

We'll gladly give you the facts on heating your home with gas, together with an estimate of the cost. Call your nearest Public Service office today.

TAKING GUESSWORK OUT OF HOUSEHOLD

The June bride and the experienced housewife alike no longer have to guess if the oven is the right temperature for biscuits, or whether the roast is getting the proper degree of heat. Accurately controlled gas cooking equipment has taken this guesswork out of the kitchen.

Realizing that customers could obtain the full benefit of gas service only through properly designed gas appliances, Public Service Company established its own testing laboratory. Gas ranges, house heating equipment, gas water heaters—every make of gas appliance must pass stringent safety, efficiency and gas-saving tests before it is sold by the company.

Through this laboratory alone, Public Service Company has effected substantial gas savings for customers—and has eliminated disappointments and complaints arising from poorly designed equipment. An example again of private initiative working to build business through improved service and savings to customers.

Gas heat can be installed in your home without allowing the house to cool off

PUBLIC SERVICE COMPANY
OF NORTHERN ILLINOIS

HOMER

Thursday afternoon, Mrs. Rodgers and her pupils of the Ross school enjoyed a play day and visited Mrs. Johnson and her pupils at the Wells Corner school.

Donald O'Leary accompanied the physics class of the L. T. H. S. to Rosenwald's museum in Chicago Wednesday.

Mrs. Wm. Ross is numbered with the sick.

Mrs. Lucinda Butcher, who was taken seriously ill Monday, is slowly improving.

Mr. and Mrs. J. Carr and son of Joliet moved their household goods into the Johnson home this week.

Mr. and Mrs. Jerome Boyce and little daughter were visitors in Chicago Friday.

Word comes from Chicago Heights that Mr. and Mrs. Elmer Rowley are the proud parents of a little daughter born Thursday, May 24. The wee one will be called Joan Ruth.

Frank Klott of Joliet is spending a few weeks at the home of his nephew, Guy Bump.

Mrs. George Bump who has been at the Silver Cross hospital in Joliet, has been removed to the home of her parents, Mr. and Mrs. Wm. Bokoski.

Mrs. Mary Korst and Wm. Rodgers of Joliet were dinner guests at the home of the latter's son Henry Sunday.

Wayne Hewitt spent Friday in Justice Park at his former school.

Mrs. T. J. O'Leary visited at the home of her mother, Mrs. Laatz in Joliet Wednesday.

Frank Sayers who underwent a minor operation at the hospital in Joliet last week, has recovered and is at home again.

John Reubens of Chicago was a week end guest in the Ales home.

Ruth Ingersol of Lockport was a guest of her grandparents here on Saturday.

Mrs. Wm. Parish of Lockport has moved to the home of her daughter Mrs. Peter Hommerding for the summer months.

Maurice Ketting, for many years a resident of Homer township, passed away Thursday, May 24 at the home of his sister, Mrs. David Agate in Orland at the age of 57 years. He leaves to mourn his loss

three sisters, Mrs. Gertrude Ludwig, Mrs. David Agate and Mrs. C. A. Angier, also four brothers, Clarence, Lloyd, Elmer and Harold of South Dakota. The body was removed from the Sonntag funeral home Friday and funeral services were held in the Orland Park M. E. church Sunday afternoon. Burial in Brooks cemetery.

Little Mary Ann Krosgaard has been visiting with her parents in Chicago the past two weeks.

Donald Carlson of Lockport was a week end guest of his school mate, Donald O'Leary.

The Ladies Missionary Society held an all day meeting in the church parlors Thursday, May 31st. Pot luck dinner was featured. Mrs. Wm. Ross and Mrs. Helen Rowley had charge of the program.

The May meeting of the Community Club was held at the town hall Friday night. Cards and bunco was played the forepart of the evening, after which dancing was enjoyed. Richard Knobel of Lemont was the musician for the evening. Trophies for high scores were won in euchre by Mrs. John Welter, John Welter, Mrs. Roy Voboth, Norman White, Mrs. Alice Schwaab and Leonard Boyce. Bunco trophies were given to Miss Cotes of Chicago, Hazel Schwaab, Lucille Schwaab, Leo Pootz, J. Baer and Harold Hewitt. The committee appointed for June activities are Raymond Hank, Gertrude Fish, Mr. and Mrs. John White, Mr. and Mrs. Fred Kopelman and Mr. and Mrs. Nile White.

Sunday afternoon appropriate Memorial Day services were observed at the Homer Congregational church. The church was beautifully decorated by the young people of the community and at the appointed time, the following program was presented: Assembly call by June Milton. Voluntary, Emily Anderson. Readings "The Blue and the Grey" and "In Flanders Fields" by Evelyn Cutler. Solo, Louise Storm accompanied by Mrs. Canuteson of Lockport. Flute solo, Jack Ellis accompanied by his mother. Whistling solo, Mrs. Reed Burch, accompanied by Mrs. Merritt Cagwin. Address by Rev. Snodgrass of the Marley church. Taps by June Milton. Reed Burch was the only soldier represented at the meeting, but Frank Savage, Edw. Marshall, John White and Reed Lynn Burch, represented sons of soldiers. Program for 1935: Mr. and Mrs. Fred Paddock, Mr. and Mrs. George Ott, Mr. and Mrs. James Bell. To decorate the graves in the various cemeteries for 1934. Brooks cemetery. Mr. and Mrs. John White, Mr. and Mrs. Ben Ingersol. Barnett cemetery. Mr. and Mrs. Merritt Cagwin. Hadley cemetery. Randall Storm. Lockport cemetery. Reed Burch. Homer Catholic cemetery, Wm. Dunn. Oak cemetery, Edwin Ott.

MARLEY

Mr. and Mrs. Bert Spiess entertained a group of young people from Chicago Sunday afternoon. Rev. Mr. Snodgrass and Miss Edith Salm were among the guests.

Mr. and Mrs. Edward Marshall motored to Kempton, Illinois Monday to attend the graduating exercises of their nephew, Donald Haley.

Wilson Gillett, who went to Colton, California, last September, is planning to go on a cruise to the South Sea Islands and to Honolulu. He has been staying at the home of Capt. Miller who is in charge of the boat. The trip will take about three months.

Dr. and Mrs. Cyrus Crane and Mr. and Mrs. Thomas Crane from Chicago, have moved back to their summer home in Marley.

Paul Horn of Joliet spent the week end as a guest of Owen Storm. The Marley school gave an exhibit and a program at the school on Tuesday afternoon. The school held its annual picnic at Highland Park, June first.

Eleanor Sabin and Iva Gillett are planning a trip to Hoopston, Ill., next Wednesday. They will visit the A. R. Wakeland family there.

Sunday evening, June 3rd, Florence Bush will have charge of the topic for the Sunday Evening Club. Florence is succeeding Ralph Tilsy as president of the club. Other newly elected officers are: Homer Sabin, vice president; Helen Tilsy, secretary and treasurer.

Mr. and Mrs. Mervin Moore spent Sunday at the home of Mr. and Mrs. Ray Ott of Lockport.

Farm Bureau Wins Over Kankakee Boosters 9 to 4

Again, before a fair sized crowd of fans, the Will County Farm Bureau baseball team won a 9 to 4 victory over the strong Kankakee Boosters, a club that had a clean slate of six wins previous to this game. The fielding of Nahas and Adams featured the contest. O. Hohenstein's catching during the absence of his brother, who was ill, was nicely done.

Next Sunday, the colored Booster A. C's will return for a double header engagement, the first game starting at 1:30 o'clock (daylight saving time.) This club's only defeat of the season was a 6 to 5 win by the Bureau nine two weeks ago. Fans, this attraction should be a real treat.

Next Saturday afternoon the Bureau club will motor to Yorkville, where they will play the Kendall County team in the opening Farm Bureau League game. It is understood that the Kendall boys are well fortified and prepared to win the divisional championship. Fans your presence at these games will be greatly appreciated, and you will be awarded by a fine brand of

baseball.

Farm Bureau 4 1 0-1 0 0-0 3 x 9
Kank. Boosters 2 0 0-0 2-0 0 0-4
Summary—3 base hits, Adams, Nino; 2 base hits—Adams, Schuldt, Mathews 2; Stolen bases—Nahas 2, Fowler 2; Struck out by Schuldt 8, by Zattau 2, by Moisant 2; by Hammond 2; Base on balls off Schuldt 1, off Moisant 5; Double plays—Nahas to Drecksler to Oswald, Nahas to Oswald, O'Connell to Tolizious to Prince. Umpires—Bennett and Keniston.

New Public Service

Rates Mean A Big

Saving to Consumers

Since the recent announcement of a reduction in rates for electricity, householders have been curious as to how much the saving will mean in their own individual cases. In response to numerous requests for a fuller explanation of the application of the reduction, District Superintendent M. J. Musser of the Public Service Company, has issued the following statement to assist residents of this vicinity in estimating how the new rate will work out in their own cases:

"This reduction in cost of electricity is estimated to save residential customers of the Public Service Company well over a million dollars a year. It provides a reduction for every residential customer, regardless of the size of his home, but it is impossible to say just how the savings will accrue to individual customers because the company has no way of predetermining the amount of electricity used for lighting and the various appliances in customers' home. No two families have the same appliances in their homes, nor use them to the same extent. For this reason it is only possible to assume hypothetical cases.

"Assuming that an ordinary modern five room home uses, in addition to lighting, a refrigerator, radio, electric iron, vacuum cleaner, percolator, toaster, washing machine, electric clock and kitchen mixer, a home of this type, making ordinary use of these appliances, will consume about 107 kilowatt hours of electric service each month. Under the old rate this consumption would have cost \$5.41.

"Under the new rate the bill would be reduced to \$4.82. On the other hand, for the same amount of money paid under the old rate it will now be possible to use all these appliances, and, in addition, to make normal use of an ironing machine, a waffle iron, one or two electric fans, an indirect floor lamp and a dishwasher. This represents an increase of about thirty percent in electrical consumption with no increase in the electric bill.

"In a four room apartment, for instance, using lighting, a radio, refrigerator, an electric iron, vacuum cleaner, percolator, electric clock, kitchen mixer and a toaster, average use of these appliances might consume 81 kilowatt hours of service in a month. Under the old rates the cost would have been \$4.19. The new rate will buy these 81 kilowatt hours for \$3.76.

"However, in a home of this type the \$4.19 bill, under the new rates, will purchase enough additional service to operate an indirect floor lamp, washing machine, ironing machine and waffle iron, provided ordinary use of these appliances is made.

"Assuming a seven room house is equipped, in addition to lighting with a radio, electric iron, refrigerator, vacuum cleaner, percolator, electric clocks, kitchen mixer, washing machine, ironing machine and an indirect floor lamp, normal use of these appliances in a home of this type might consume 134 kilowatt hours of service during the month. At the old rates, this amount of energy would have cost \$7.10. The bill for the same amount of electricity under the new rate, with these same conditions, would be \$6.43.

"In the same way, under the new rate, this home can use, in addition to present appliances, a dishwasher, an electric sewing machine, a waffle iron, an additional radio, electric fans, a kitchen ventilating fan, toaster and an additional indirect floor lamp at no greater cost than under the old rates.

"Formerly the lowest step of the Public Service Company's residential rate was 3 cents a kilowatt hour. The new low step of 2 cents a kilowatt hour will permit the customer who desires a wider use of electric service the opportunity to add appliances at a much lower operating cost. The low cost of operating some of the ordinary appliances, under the new 2 cents step in the rate, based on normal usage in a home is as follows:

Refrigerator...\$12.00 per year
Electric Iron...1 cent per hour
Kitchen mixer...5 hours for 1c
Indirect floor lamp 2 hrs. for 1c
Vacuum cleaner...3 hrs. for 1c
Washing machine 2½ hrs. for 1c
Dishwasher...2½ hrs. for 1c

Diet Helps to Combat Winter Complexion Ills

Miriam Jordan, Fox featured player, shown with part of her daily quota of fresh milk. "It's good for your complexion," she says.

AS THE seasons change, complexion problems seem to change with them. In the summer it's sunburn and freckles we have to combat and in the colder seasons it's apt to be a red nose, chapped skin or pimples. Usually a red nose is an indication of poor circulation and is most apt to be noticed in those who get little outdoor exercise. As to the chapped skin problem, most beauty specialists agree that a good foundation or protective cream is advisable in any season of the year to guard the skin from the effect of sun, wind and dirt.

No doubt the reason that pimples appear more often in winter than in summer is the rich, heavy food we usually eat during the winter months. All the facials in the world won't eradicate pimples that are caused from within—by improper diet. Fresh milk, fruits and vegetables—these are the foods that help you to a clear, smooth complexion, unmarred by blotchiness.

Have a Fresh Milk Complexion. In fact, the person who coined that

phrase, a "peaches and cream complexion," was not only describing a lovely skin; he was also naming two of the foods that help to create it. For peaches together with cream's "better half"—fresh milk—are two excellent complexion foods, the peaches supplying iron for the color that glows in healthy cheeks; and the milk, if it is given a chance, will do for the grown woman's complexion what it does for young babies' whose only food it is.

Three reasons why fresh milk is so valuable as an inside complexion treatment are: its abundance of Vitamin A helping to resist infections; its Vitamin G which aids in "preserving the characteristics of youth"; and its rich supply of calcium, one of the minerals which keeps the glands in the body working as they should.

Perhaps more important than any single one of these factors is the combined effect of all the food elements in milk which have such a beneficial effect on the general health, because the skin is usually the first part of us to reflect a poor physical condition.

Milkman and Grocer Deliver Beauty Treatments

Fruits, vegetables and milk are needed daily.

YOUTH Preserver, Tissue Builder, Scalp Nourisher, Hair Tonic, Eye Rejuvenator, Reducing Medicine—we are accustomed to seeing these labels on our cosmetics and lotion bottles. But they might as truly be put on the outside of our milk bottles, fruit baskets, vegetable containers and egg cartons, for these foods contain in them minerals, vitamins and proteins which genuinely deserve such tags.

Of course you can't just go out and buy a vitamin but if you could and if these vitamins could be wrapped up neatly in cellophane and scented with the perfume of flowers, this is how the labels should read (with suggestions for suitable color schemes):

Vitamin A
Resister of Infections, Including Those of the Skin and Eyes, Promoter of Long Life (Tint yellow to suggest the carrot which is one of its sources).

Vitamin B
Use Generously as Protector Against Ravages of Nervous Troubles. (Natural shade, as the neutrally colored whole grain cereals are good sources of this vitamin.)

Vitamin C
Builder of Beautiful Teeth and Bones. (Deep red for the tomato which, with the citric fruits, is richest in this vitamin.)

Vitamin D
To Be Used With C to Produce Healthy Teeth and Bones. (Gold for the sunlight which forms it.)

Vitamin G
Preserver of the Characteristics of Youth.

(Creamy Ivory, for fresh milk its best supply.)

Notice that, like the most exclusive French perfumes which are designated simply by numbers, the vitamins, with elegant simplicity, are called just by letters.

The minerals and proteins deserve attractive packaging and enthusiastic advertising too. Protein should have a label written like this—Tissue Builder and Repairer. Of the minerals, calcium, phosphorus and iron lead the way. Calcium, besides working with Vitamins C and D to produce healthy teeth might have a label—Nerve Tonic. Phosphorus is a fourth member of the tooth and bone building quartette, and iron is a Putter-of-Roses-in-the-Cheeks. Of course, like all approved "beauty lines" to get the best results you must use every single one of these nine elements regularly. For working together, they create healthy, well-nourished hair, slim figure, satiny complexion and the sparkling eyes that give evidence of buoyant health.

But fortunately it is unnecessary to go forth and buy nine expensive bottles or jars to get these precious food elements. Just let your milkman and grocer deliver their inexpensive fresh milk, fruits, vegetables and eggs at your door and you will have all these vitamins and minerals at hand. Actually, a daily quart of milk comes near to being a complete beauty treatment by itself, for it contains all the food elements just mentioned. Supplement with liberal servings of fruits, vegetables and eggs, your beauty diet is just that much strengthened.

Save Money, Help Farmer by Using State-Grown Foods

By WALTER W. McLAUGHLIN
Director, Illinois Department of Agriculture

THERE are probably few people in Illinois who do not sympathize with the farmers in our state and in the entire country for that matter. No doubt most of us have said at one time or another, "Seems like some-

WALTER W. McLAUGHLIN, DIRECTOR, ILLINOIS DEPARTMENT OF AGRICULTURE

thing ought to be done to help out the farmer." However, we usually think of that "something" as a remote action—something that some one else should do, that the average citizen could have no part in.

On the contrary, the most effective help for the farmer can come through the so-called average citizen—through each individual's buying more of the Illinois farmer's produce. To take the most obvious example, every day the papers bring us news about the difficulties of the Illinois dairy farmers—how the necessity for keeping their production down to the level of the public's consumption is forcing many of them into poverty.

At present the average person takes only a pint of milk a day.

If each one of us took a quart every day as nutritionists say we should in order to attain the best health and the most attractive appearance, we would of course be consuming twice as much. Think what this would do for the prosperity of the farmers.

Helping the Farmer Means Helping Yourself.

Selfishly, of course, this improved economic condition would eventually indirectly affect all the rest of us. Then, too, of course we would be directly saving money by using milk, which gives the greatest food value for the money, instead of more expensive foods.

Amazing figures could be quoted on the effect that increased consumption would have on Illinois other principal food products—corn, of which Illinois produces 339,845,000 bushels yearly; potatoes, 4,675,000 bushels; apples, 8,916,000 bushels; peaches 4,300,000 bushels, and grapes, 6,800,000 bushels.

Taking each food separately, it is easy to see the direct economy in "Buying Illinois." Milk alone provides an ample supply of easily utilized proteins, calcium, phosphorus and necessary vitamins. Because of this complete food value, nutritionists say that as the food budget is lowered the amount spent for milk should be increased proportionately. The fact that it would take 42 pounds of meat or 30 pounds of potatoes to supply as much calcium as is contained in a single quart of milk is a striking illustration of the concentrated food value of milk.

Potatoes are famous as a cheap source of energy with the bulk that stays the pangs of hunger. Corn has the advantage of being inexpensive, both in fresh and canned form; and—a fact not generally realized—the lowly apple may well be used at breakfast and other times in place of the more costly orange, for apples are also a good source of that Vitamin C, for which oranges are chiefly important.

Artificial Mouth and Ear Speak and Listen During Tests of Telephones

Above: A telephone receiver being clamped to the artificial ear in the Bell Telephone Laboratories, to undergo tests of its efficiency in reproducing the human voice.

Actuated by electric currents, the telephone receiver reproduces the sounds which are "heard" by the transmitter at the other end of the telephone line. The telephone receiver can thus be regarded as an electrical mouth.

Receivers Have Single Task

The telephone mouth, however, has somewhat more limited functions than do human mouths. Human mouths talk into the space of rooms, big and little, and into outdoor space. Sometimes human mouths must talk softly, sometimes loudly; sometimes they must shout. Telephone mouths (receivers) have a single task. Held close to human ears, they talk always into the same kind of room, as it were, and must do so without wide changes of loudness. To test telephone receivers, other than by having them talk into human ears, telephone engineers had to devise an artificial ear for the telephone mouth to talk into, one which would perform and respond acoustically very much like the human ear.

Corresponds to Human Ear

Such an artificial ear has been developed at the Bell Telephone Laboratories in New York for the testing of telephone receivers. The Laboratories' artificial ear provides an ingenious system of air space and ear drum which responds to sound just as does the human ear. Instead of an ear drum and associated bones, which in the human ear send nerve impulses to the brain, the artificial ear drum transmits electrical impulses along a circuit to electrical measuring instruments.

It is this artificial ear which makes possible the quick and accurate testing of telephone receivers under conditions similar to those they meet in actual daily use, but without the usual variations in human ears or the conditions under which they listen.

Develops an Artificial Voice

Telephone transmitters, into which human mouths speak, must undergo thorough testing also.

In square at left is a diagram of the human ear, showing relation of telephone receiver and air passages. In oblong is shown a diagram of the artificial ear.

Above: The artificial voice speaking into a telephone. Left: The voice instrument.

Human mouths could be used to speak into these "electrical ears" of the telephone system, but the great amount of talking necessary would become a laborious and tedious task for those mouths. Therefore an artificial mouth was also developed at the Bell Laboratories, to substitute for a human mouth.

Must Be Like Human Mouth

In the first place, the size of the artificial mouth must be about the size of the human mouth. The artificial mouth must also be able to speak with vibration frequencies from 100 vibrations per second to 7,000 vibrations per second. Human mouths can speak in whispers or shout loudly, the loudness of sound varying about in the ratio of 100,000 to 1. The loudness of the sounds or of speech from the artificial mouth satisfactorily approximate the human mouth in this regard. Telephone transmitters are held a short distance from the human mouth, and this affects somewhat the sounds they receive. The effect of the transmitter on the sound from the artificial mouth must be the same as for an actual speaker.

Simulates Human Speech

This artificial mouth must be able, in other words, to produce all the intonation, the naturalness, the articulation, the sibilance and other qualities which make up the characteristics of human speech.

It does all this, and more. A person can speak loudly or softly, but he cannot materially change the degree of loudness of his voice without also changing its pitch, or tone. But the artificial voice, by means of electrical controls, can vary either the loudness or the pitch independently. It can even transmit pure tones of any pitch.

Subject to Exact Specifications

With the human voice, it is difficult to define exactly the characteristics of speech employed during a test, or to duplicate them at another time or place. The artificial voice, on the other hand, can be subjected to exact specifications.

Three Are Awarded National Vail Medals for Notable Public Service

Mrs. Lila Cook Gaddy, operator, Streetman, Tex. Center: Henry R. Bell, line foreman, Salem, Mass.

Mrs. Irene Regina Duncan, operator, St. Joseph, Mo. Circle: One side of the Theodore N. Vail Medal.

An operator who used her head and the telephone facilities to aid in the apprehension of a pair of murderers; another operator who got the message through at great personal risk; and a line foreman who employed his special knowledge and his working equipment to save a life which would otherwise have been snuffed out, have been awarded national Theodore N. Vail Medals in silver, each accompanied by \$250 in cash.

These three telephone employees who have been thus honored are Mrs. Lila Cook Gaddy, operator, Three States Telephone Company, Streetman, Tex.; Mrs. Irene Regina Duncan, operator, Southwestern Bell Telephone Company, St. Joseph, Mo.; and Henry R. Bell, line foreman, New England Telephone and Telegraph Company, Salem, Mass.

Helped Apprehend Gangsters

Mrs. Gaddy received a citation describing the service for which her medal was awarded as follows:

"For alertness and initiative which led to the apprehension of two desperate criminals.

"While on duty on January 3, 1932, at Streetman, Texas, she learned that two men had ditched a car on a nearby highway, had disappeared and that firearms and a Missouri automobile license plate had been found near the scene of the accident. Suspecting that they might be two fugitives whom she had heard described the previous evening in a radio broadcast concerning the shooting of six police officers at Springfield, Missouri, she obtained a description of the men and, finding that this tallied closely with that of the fugitives, notified the authorities at Streetman and Springfield. As a result, the pursuit of the fugitives was taken up promptly and two days later they shot themselves rather than submit to capture."

Delivered Urgent Message

A citation issued to Mrs. Duncan states that her medal was awarded:

"For courage and perseverance in delivering an urgent telephone message.

"On the evening of September 9, 1932, at St. Joseph, Missouri, the messenger service usually employed having failed to locate a man for whom there was a long distance telephone message, announcing the death of his son, she volunteered to find him and deliver the message. Nothing was known of the man's whereabouts except that he was employed on a government dredge somewhere along the Missouri River, near St. Joseph.

"With a younger sister, at night, she searched from boat to boat, traveling thirteen miles, in part by automobile and in part by foot, largely through a rough and dangerous area, until she finally found the man and delivered the message."

Rescue Under Great Hazards

Mr. Bell's award, as described in his citation, was:

"For prompt, courageous, intelli-

gent and effective action in rescuing a man caught by falling debris in a partially burned building.

"On December 1, 1932, while working with a crew of four men at Peabody, Massachusetts, he learned that a man had been caught by the collapse of a portion of the second floor of a nearby tannery building, which had been partially destroyed by fire.

"With his men, Bell hurried to the scene, taking with him bars, ropes, chains, blocks and tackles. At once realizing the necessity of undertaking the rescue work with extreme care, in order to avoid causing further sliding or fall of debris and weakened timbers, which would have imperiled the victim and rescuers alike, he warned a fire captain, who had arrived with his men, of this danger. At the latter's suggestion, Bell continued in charge of the rescue work.

"He ordered the weakened walls and floor timbers, together with bales of hides, machinery and other material resting upon them, to be secured by ropes fastened to nearby buildings. This done, he directed the removal of timbers and other heavy objects which were holding the man a prisoner. With the help of a fireman, Bell pulled the victim free, carried him to a place of safety and placed him in an ambulance, which took him to a hospital, where he fully recovered. Between Bell's appearance in the building and the patient's arrival at the hospital, only twenty minutes elapsed."

"For Noteworthy Public Service"

The Vail Medal awards are made annually and are provided for by the Vail Memorial Fund established as a memorial to Theodore N. Vail, late president of the American Telephone and Telegraph Company, who at the time of his death, on April 16, 1920, had long been recognized for his conspicuous service in the development of the art of telephony.

Under the terms of the establishment, bronze, silver and gold medals are awarded to members of the Bell telephone organization throughout the United States, for acts or services which conspicuously illustrate Mr. Vail's ideals in public service. Each medal bears an inscription declaring that it is awarded "for Noteworthy Public Service."

The bronze medals are awarded by Regional committees in the territory of each Associated Company of the Bell System. Twenty-one bronze medals have been awarded for services performed during 1932. The National Committee of Award reviews the cases in which bronze medals have been awarded, together with any other cases that may be submitted, selecting for special recognition by the award of gold or silver medals those cases which appear to have been of conspicuous excellence or importance. In addition to the personal medals, bronze plaques commemorating the gold and silver medal awards are presented to the telephone companies whose employees have received these awards.

EMERGENCY WIRE HOOK-UP TELLS OF STORM DISASTER

When a tornado struck the town of Liberal, Kans., a short time ago, killing five persons and injuring 150 others and wiping out the business district, the town was cut off from telephone and light service. Help was sent at once to restore telephone service, and toll lines were cut at the edge of the town, where a temporary office was set up by plant men of the Southwestern Bell Telephone Company from Dodge City.

Three magneto sets were hooked to toll circuits to Dodge City, Hutchinson and Wichita. One telephone was hung on a fence post and the others were placed on a sign board. They were put in use immediately and, by lantern light, these telephones were operated practically all night, giving to the world outside the first accurate news description of the damage. Boy Scouts on foot, on bicycles, and on horseback acted as messengers to assist in locating people on inward calls.

A NEW FORD DEALER

ORLAND MOTOR SALES CO.,

IN KEEPING with the Ford Motor Company policy of providing the highest type of representation in each community, the Orland Motor Sales Co., has been selected to handle the sale and service of Ford cars and trucks.

This new dealership, in addition to furnishing complete Ford service facilities, offers to the people of this locality a better opportunity to become acquainted with the outstanding features of the New Ford V-8. You will be welcome at any time to inspect these cars and to drive them yourself.

The Ford Motor Company policy is founded on the belief that a sale does not complete the transaction with the buyer, but establishes a new obligation to see that the car gives good, economical service.

The Orland Motor Sales Co. as an Authorized Ford Dealer, is pledged to carry out that policy. Thoroughly trained mechanics, using approved tools and machinery, service Ford cars and trucks. Only genuine Ford parts, priced low, are used. All labor is billed at a standard flat rate.

This new dealership is now open and ready to serve you. We are confident they will do it well.

ORLAND PARK

The Mission held at the St. Michael church closed last Sunday and was very largely attended.

On the last day of the mission there was hardly standing room.

The village of Orland Park is saving \$286 in its street lights thru the reduction of rates and reduction of the hours from dusk to 2 a. m., instead of dawn. The lights will go on the dusk to dawn schedule after September first.

The Orland Park Royal Neighbors camp held a Memorial service last Thursday in connection with their regular meeting. Following the service, bunco was played. The graves of the departed members of the camp were decorated.

The hostesses at Thursday meeting were Mrs. Yates, Mrs. Parker and Mrs. Felten.

While washing dishes Monday, Mrs. Sam Margolis cut her right hand quite badly when a tumbler she was washing, broke.

BEG YOUR PARDON!

Thru an oversight in printing the list of teachers of the Orland Park public school re-engaged by the local school board for the ensuing year, the name of Miss Lucille Schmadeke as primary teacher was omitted. We beg Miss Schmadeke's pardon for the unintentional oversight.

The state highway department has men engaged in watering the newly set out tree, on 159th street and other paved highways in this section.

Mrs. Louis Arnold and daughter Ruth who figured in a serious auto accident in Chicago, were brought home from the Burnside hospital the past week and are convalescing.

Mr. and Mrs. Loyd Kettering, Elmer, his daughter Arlene, and Harold Kettering drove through from Mellette for the funeral of Maurice Kettering. They will spend a few days visiting relatives and friends here.

ORLAND SCHOOL NEWS

Orland Park Commencement will be held in the school auditorium on Thursday evening, June 7 at 8:30. All friends of the school are invited. Children under twelve years of age

must be accompanied by their parents.

The Upper Grade Room will hold an exhibit of their year's work on next Monday afternoon at 3 o'clock to which all friends are invited.

The baseball team played a game with Ideal School on Tuesday after noon.

There was no school on Wednesday and Thursday on account of Memorial Day and World's Fair day

IN MEMORIAM

DAVIDSON THOMAS—In loving memory of Thomas H. Davidson who passed away three years ago May 29, 1931.

Even now by faith we join our hands
With those who have gone before
And greet the blood besprinkled band
On the eternal shore.

WIFE AND CHILDREN.

Tinley Ball Team

Proves A Winner

Tinley Park Baseball Team started their 1934 season Sunday, May 27th by defeating the Chicago Buddies 14 to 5. Gotham pitched for Tinley and with the aid of good support from his team mates coasted along to an easy victory. Johnnie says he has broke the strike out jinx, this he proved when he connected three times out of four times at bat.

Haney returned to the lineup on Sunday, after a bad finger injury, and played a fine game at short-stop, covering lots of ground, and making some sensational catches of fly balls, that looked like they were base hits.

Larry Gray, came out with a new base ball bat, and it looked for awhile like it was just another bat, but after waving it around a few times, he found a place that was good for a hit.

A certain ball player on the Tinley team was missing after being relieved from his duties in left field and it was thought for a time he had been carried away by one of

the Homer Pigeons that were released by the visiting team, but after a careful search he was found stretched out underneath a truck in a cloud of cigarette smoke. It's funny how some players abuse the habit of smoking.

We will try and get some bleachers put up, before the season is much older.

Chinch Bugs Now

Hatching; Barriers

Will Shield Corn

Hatching of chinch bugs in small grain fields has started and farmers of Will County should not delay longer in taking steps to protect their corn fields against the pest, according to a warning which Farm Adviser L. W. Branham has just received from W. P. Flint, chief entomologist of the Illinois State Natural History Survey and of the College of Agriculture, University of Illinois.

Last year the bugs reduced the corn crop in 70 Illinois counties from 15 to 50 per cent and unless the weather comes to the rescue of farmers, the damage from the insect may be double that of last year, Flint said. So far the spring weather has not lessened the danger of losses, he added.

Serious damage may still be prevented if there are heavy rains during the next three weeks to drown out some of the bugs, but if the dry weather continues, the injury done by the pests in infested small grain fields will increase enormously, Flint warned. Following that, the bugs will migrate to corn fields where they will take an even heavier toll unless precautions are taken to check their march, he said.

"Where small grain adjoins corn, whether the small grain be wheat, oats, rye or barley, it should be carefully examined and if old chinch bugs are found in numbers of five or more a linear foot of grain, it will be advisable to put a barrier between the small grain and the corn. The barrier bridge or barrier path should be made at once in order to be ready for the movement of the bugs out of the small grain into the corn. Throwing up the barrier immediately may help prevent heavy losses."

Will County farmers can get full information about the construction of barrier ridges from the farm adviser's office or from Circular No. 419 "Fighting the Chinch Bug on Illinois Farms", which has just been issued by the College of Agriculture, University of Illinois. It also gives the latest information on repellent materials to use in barriers.

CASS STREET

Why be NERVOUS

There's a time-tested, harmless, preparation, compounded by a specialist in nervous disorders, for the relief of Sleeplessness, Irritability, Nervous Indigestion, Nervous Headache, Restlessness, the Blues and Hysterical Conditions.

During the more than fifty years since this preparation was first used, numberless other nerve sedatives have come—and gone. But the old reliable has always been in constantly increasing demand. Only one medicine fits this description.

DR. MILES NERVINE

If you are nervous, don't wait to get better. You may get worse. Take Dr. Miles Nervine. You can get Dr. Miles Nervine—Liquid and Effervescent Tablets—at your drug store.

HELPED 98 PERCENT

Interviews with 800 people who had used or were using Dr. Miles Nervine showed that 784 had been definitely benefited. Isn't anything that offers a 49 to 1 chance of helping you worth trying?

Get a package of Dr. Miles Nervine today. If it fails to help you—take the empty bottle or carton back to your druggist, and he will refund your money.

CHAPTER XIII—Continued

"That," declared Peter, with slow emphasis, "is the most significant point of all. Fletcher claims Franklin never kept a gun at the apartment. The man is telling the exact truth, or else he is protecting the murderer. And yet, we can find no motive that would cause Fletcher to pursue such a course. I think the fellow might protect the identity of a woman who had been indiscreet. I don't think he would protect the murderer. We have proof of it, in fact. Had he been in league with Franklin's slayer, it would not have been necessary to search the apartment, as was done. Fletcher could have accomplished such a search without any difficulty and without our knowledge.

"That means that Franklin kept the weapon elsewhere. Where? At the apartment he kept for Choo Choo Train? In another possible apartment kept for the woman in blue? At his office?"

"Sergeant," Cardigan spoke with evident conviction, "this evidence led me, ultimately, to two clues to which I did not at first attach sufficient importance. And those two clues, I believe, will prove not only the identity, but the guilt, of the murderer. They are the revolver and the key-ring we found in the murdered man's pocket."

CHAPTER XIV

Introducing the Murderer

"We have identified six of these seven keys," Peter continued, indicating the ring which Kilday was holding in his hand. "One opens the street door of Franklin's apartment building; a second opens his apartment; another fits Choo Choo Train's door; the fourth opens the door of his general offices and the fifth is to his private office. That's an end of the large keys. Of the smaller ones, the first opened his desk and the last one still remains unidentified. Call Milo Dunbar, will you? I believe he can help us trace this key. We should have done it before. And unless I'm clear off the track, we'll know who the murderer is when we succeed in doing that."

Franklin's partner was located at his office and promised to come at once. "Ask him to bring the key to Franklin's private compartment of the safe," Peter interrupted to suggest. "We'll want that, too."

"I think," he continued after Kilday had replaced the receiver, "that we can definitely abandon the idea that Franklin maintained a separate apartment for this woman in blue. If he had done so, why doesn't the key appear on this ring? All his other keys are here. There have been times I have been tempted to abandon this woman as a clue, for this very reason, and yet she was the motive for the crime, I'm sure. No other solution fits the facts. And since I have arrived at that solution, I can see a very good reason why Franklin had no key to her apartment."

"Was it the Shipley girl?" Kilday demanded. "I'm sure it wasn't she," replied Peter. "In their effort to protect others whom they feared were guilty, a number of people have deceived us. That has added to our complications and that's why you have suspected this girl."

At this point the attorney arrived. Peter Cardigan was still contemplating the slain man's key-ring when he entered.

"Did you bring the key?"

"Here," Dunbar handed it to the novelist, who compared it carefully with the small, unidentified key on the ring. His examination completed, he reached for the nurse's pad on the table beside him, and scrawled a few hurried notes upon it.

"How does this key fit into the case?" Kilday could no longer restrain his curiosity. "I'm not sure," Peter directed a significant glance at his friend. "Here," he handed him the notes he had just written. "With that much to go on, perhaps you can make Rylie Carmody talk."

"But I thought you said—"

"Never mind what I said before," Peter replied earnestly. "I may have changed my mind. Look over these notes and follow instructions."

Kilday shrugged and left the room. "Then you think it was Rylie Carmody, after all?" suggested Milo Dunbar. "I must confess I don't understand how that key had anything to do with him."

"We'll soon know," Peter replied shortly.

The attorney walked to the window, his back to Peter and hummed a few bars of a tune. "I suppose the theory is that young Carmody committed the murder to prevent Franklin's marriage to his sister?"

"No. That's no longer the theory. We now believe that the murderer killed Franklin because he discovered the latter's love-affair with the woman in blue."

"The woman in blue?" Dunbar wheeled and eyed the novelist curiously. "That's the mysterious visitor Franklin had in the sacristy just before the crime. Have you been able to identify her?"

"That all depends on Kilday," declared Cardigan frankly. "If his errand is successful, we'll be able to identify her without any further trouble."

"I gather that you have come to the conclusion that jealousy was the motive for the crime?"

"Yes. Either jealousy or revenge. In his relationship with this woman, Franklin betrayed a trusted friend and that friend committed the murder, if my theory works out. And it must work out, Mr. Dunbar," continued Peter with conviction. "It's the only theory that fits all the facts."

"I'm interested," Dunbar took a chair beside the bed. "I'd like to hear the whole story. Can't you take me into your confidence? Remember, Franklin was my partner."

"When Kilday comes back," promised the novelist. "He won't be long."

"May I see those keys?" The attorney extended his palm. "I'm curious to know what they had to do with it. Why did you ask me to bring the key to Franklin's compartment of the safe? What does young Carmody have to do with that key?"

"The keys?" Cardigan stared about him blankly. "They were here a moment ago. I must have dropped them."

"Yes," declared Dunbar evenly. "You must have dropped them—into Kilday's hand. You're lying to me, Cardigan. Why did you give those keys to Kilday? Why did you write

"Poison."

him that note? What did you have to say that you didn't want me to hear?"

Peter smiled into the angry man's eyes, his hand sliding stealthily, almost imperceptibly toward the bell cord on the table beside his bed. "I believe I mentioned Rylie Carmody," he was sparring for time.

"Only to throw me off the track," retorted Dunbar. "Kilday didn't know what you were talking about when you mentioned him."

Then, for the first time noticing Cardigan's cautious reach for the bell, he forestalled it with a deft jerk of his elbow that sent the small table careening and knocked the bell cord to the floor.

"Then I was right," he said shortly. "You win—again," declared the novelist, his alert glance intently studying the attorney's expression. "My luck was just as bad the other night—at your office."

Before replying, Dunbar locked the door.

"I suspected you had guessed when you wrote that note to Kilday," the lawyer admitted calmly. "How did you do it?" His eyes, slightly bloodshot, returned the novelist's steady gaze.

"You left a very plain trail," declared the latter. "Once it was discovered, we couldn't miss. The only difficulty was that there were so many trails, partly due to your efforts, that yours was obscured. We knew Franklin was killed by someone he knew intimately, otherwise he would have warned Royce, who was only a few feet away; the murderer carried Franklin's own revolver; the murderer called Choo Choo Train and imitated Fletcher's voice in telling her to go to the church; the murderer could not have been in the church, proper, at the time the crime was committed, but he had to be on the ground."

"The woman in blue must have been the motive, because the guilty person took such active steps to remove all clues to her identity, and, in conclusion, Franklin's apartment was searched, not once, but twice, and I was attacked in your office. Only one person answers all these descriptions, Mr. Dunbar. That is you."

"Royce looked for you at the church but couldn't find you out in front, for the very simple reason that you weren't there. Franklin kept that revolver at his office. After searching elsewhere, there was no other conclusion we could reach. You were the only person who had access to it there. You were in great haste to search your partner's apartment, immediately after his death. You told Fletcher you were looking for a will. But you and I know you were there to destroy any evidence which might identify the woman in blue as your wife, before the police arrived. You didn't find it then, and were anxious for another opportunity to conduct the search when Fletcher wasn't present. At the first opportunity, that's exactly what you did, and that's when I picked up your trail, although even then I didn't realize who my quarry was. You used a key you found in your wife's possession to enter that apartment. Remember, too, that my assailant must have had a key to enter your office. The

trail was plain from the first, and you are the only one who fits the description, in every detail."

Dunbar, head on one side, lips pursed judiciously, had the manner of a judge weighing evidence. "All very plausible," he nodded his head. "But still only theory."

"Here is some more of it," retorted the novelist. "The night before the wedding, your suspicions of your wife and Franklin aroused, you broke into his compartment of the safe. There you found evidence which supported those suspicions. And the revolver, too. That," he admitted, "is still only a guess. But I'll know whether or not it's a true one in a few minutes."

An expression of annoyance flitted across the attorney's countenance. "Guesses!" he said. "Guesses! You're always talking of guesses! What made you make such a guess?"

"In the first place, you were the only person who fitted every possibility of the crime. In the second, there were Franklin's keys. I couldn't understand why all his keys were intact, upon his ring, except the key to his compartment of the safe. It seemed strange that he should have kept that, of all keys, lying carelessly in his desk where you found it for us. Then the solution occurred to me and I compared that key we found there with the one we had been unable to identify upon the key-ring, remembering how similar they were in size and appearance. Remember, I had tried to use that unidentified key to open that compartment. I was able to insert it in the lock but it wouldn't turn the bolt. Do you know why?"

"They were both keys to that safe. When I compared them a few minutes ago, I discovered they both bore the same manufacturer's serial number. One of those keys belonged to you, Mr. Dunbar. The other was Franklin's."

Peter stared at the attorney expressionlessly. "With that much to go on, I felt confident that I knew how we had been duped. We were puzzled because we couldn't find any clue to the woman in blue among Franklin's personal effects. This was now explained. You had removed those clues when you searched Franklin's compartment the evening before, to verify your suspicions regarding him and your wife. Afterward, it occurred to you that this broken drawer might incriminate you if we discovered it. So you transferred the remainder of his effects to your own drawer, leaving your key in Franklin's desk. The broken drawer you appropriated for your own use. And that," declared Peter with finality, "is what I wrote Kilday a few minutes ago. He is on his way to your office to check up on those two drawers in your safe. Unless I am mistaken, he will discover that the key on Franklin's ring fits the broken compartment which you are now using."

"Simple, when you think about it, isn't it?"

"You make it sound simple," the attorney replied.

"The only thing that puzzled me is why you returned to your office that night," Peter continued. "You had already destroyed the evidence in Franklin's compartment."

"I was afraid there might be some evidence elsewhere that I had overlooked, and I wasn't expecting you to hunt the murderer there." The attorney was making no effort to maintain a pretense of innocence. "I couldn't very well go through the place in the daytime without exciting comment from the employees. I felt perfectly safe in making the search at night, however, until," he shrugged, "you appeared on the scene. None of my employees had an excuse to be there at that hour, and I knew that the janitor's force did not come on duty until ten o'clock, so naturally I was alarmed when I heard your key in the lock. I didn't realize, or have time to consider that you might be coming there to trap some one else. I lost my head, I guess. At any rate, I determined not to be trapped there, so I turned out the lights and waited for you in the dark. You know what happened."

Peter glanced at the locked door. "What's the idea?" he asked. "You can't hope to escape. By this time Kilday has verified the manner in which you switched boxes with Franklin."

"Oh, yes. There's always one method of escape. But don't be alarmed. That was only a precaution against interruption."

From his pocket he took a small vial. Removing the cork, he smelled of the contents. Then he smiled. "Poison," he explained. "I've been carrying it about with me for several days. Even before I killed Franklin, I made up my mind that I would never be taken alive."

Dunbar raised the bottle gravely. "Before I go," he said, "I want to say I'm sorry you went through the window. I had nothing against you. I only wanted to get out of there, undetected."

The momentary delay gave Peter the opportunity for which he waited. With all his strength he hurled his pillow at the bottle poised in Dunbar's hand, hoping to knock it from his grasp.

His aim was true, but the bottle did not fall. The fingers which clutched it were too sure of their grip.

There was reproach in the attorney's glance. "After making this the only escape possible," he asked, "would you rob me of it?"

He raised the bottle slowly. "I don't blame you for anything but that pillow," he declared gravely. "You're quite a detective, Cardigan. I should be an authority on the subject."

Milo Dunbar took his only means of escape.

(THE END.)

OLD CHRISTMAS STILL KEPT UP

Had Origin in First English Colony in New World.

Each year we read with sentimental interest descriptions of the celebration of "Old Christmas" by fisherfolk and other residents of the ancient village of Rodanthe, on the long and narrow outer barrier islands that impound Pamlico sound off North Carolina. Sometimes we read that the celebration is held on January 5 and sometimes that it is held on January 6, the difference being that Twelfth Night, or Old Christmas Eve, may have greater emphasis in celebration than Twelfth Tide on Twelfth Day (Old Christmas Day) as the villagers continue a celebration that extends back to their forefathers and even the time of Sir Walter Raleigh and establishment of the first English colony in the New world.

However, if we search the back districts of the Missouri Ozarks, it is quite likely that we could find this belated celebration of Christmas much closer to our own modern homes, as well as hear the belief expressed that on Twelfth Night cattle of the fields kneel in greeting to the new-born Christ. This tradition and refusal to accept the calendar corrections of Pope Gregory were brought to this country by early settlers from Britain and persisted for many generations not only in the barrier islands that protect North Carolina from the raging sea, but in the mountains along the eastern seaboard, spreading even to the Ozarks of Missouri and Arkansas as the mountaineers sought new homes.

It is fitting, however, that the tradition had its spread only by family and that the outstanding community expressions remains near the place it was introduced to America, in Dare county, North Carolina, where the first white child to be born in America came into being. This child was Virginia Dare, granddaughter of John White, a leader, whose small Roanoke island colony disappeared without trace while White was on a journey home for supplies.

Rodanthe is only about a score of miles from Roanoke island and a part of the same chain of banks, with Kitty Hawk, where the first successful airplane flight was made, only a few miles away on the same chain. So what better place could

be found for the support of tradition, even though there be some uncertainty whether it is in observance of Old Christmas Eve or Old Christmas Day that fishing nets are laid aside?—St. Louis Globe Democrat.

"Grandfather" of Radio

Thomas Edison, who has been called the father of electric light and the phonograph, may likewise be considered the father—or at least the grandfather—of modern radio, since in 1883 he made the progenitor of our modern radio tubes, and took out a patent that Marconi later purchased.

This was revealed at the national electrical exposition in New York, when members of the New York Electrical society used one of Edison's early lamps as detector tube in a radio set, and successfully received a regular broadcast program with it. The great inventor was aware of the electrical action of the tube.—Literary Digest.

Mercolized Wax

Keeps Skin Young

Absorbs blemishes and discolorations using Mercolized Wax daily as directed. Invisible particles of aged skin are freed and all defects such as blackheads, tan, freckles and large pores disappear. Skin is then beautifully clear, velvety and so soft—face looks years younger. Mercolized Wax brings out your hidden beauty. At all leading druggists.

Powdered Saxolite
Reduces wrinkles and other age-signs. Simply dissolve one ounce Saxolite in half-pint witch hazel and use daily as face lotion.

Penalty of Greatness

It would be impossible to find a single great man in the world today who has not had some mud thrown at him.—Maxim Gorky.

"spring fever" time is here

...and what does it mean to you?

JUST THIS: if you feel listless, run-down, appetite dull, with a weak, let-down feeling ... perhaps nervous and worn out ... why not make an effort to "snap out" of this condition? Try toning up your appetite ... increasing your red-blood-cells ... the best way to be happy. You need a tonic—not just a so-called tonic ... but a tonic that will tone up your blood. S.S.S. is specially designed to do this for you. Unless your case is exceptional you should improve as your oxygen-carrying hemo-globin increases. At all drug stores in two convenient sizes. The larger size is more economical. © The S.S.S. Co.

In the Spring—take S.S.S.

Cuticura Talcum, pure and medicated with balsamic essential oils, is indispensable to the comfort of every member of the family. Get the beneficial results of these essences by dusting on **Cuticura Talcum**—see how cool and refreshed your skin is, free from any chafing or irritation. Truly beneficial to the skin and especially recommended for babies.

• • A DOLLAR AND A
HALF WORTH OF OIL
PROTECTED THIS
MOTOR FOR OVER
FOUR THOUSAND
MILES!Low Consumption
and Motor Protection
proved in the most
daring and convinc-
ing Motor Oil Test
ever madeWHEN New and Improved Conoco Germ
Processed Motor Oil was perfected, it had
lubrication values so great that a mere
statement of them would seem absurd.
Could you believe that any strictly stock
motor could run 4,729 miles on just five
quarts of oil before wrecking itself? It did
—and Conoco proved it in competition
with five widely known, nationally adver-
tised, quality brands of motor oil!The competition was held at the Indian-
apolis Motor Speedway, under the super-
vision of the Contest Board, AmericanAutomobile Association. Six new, strictly
stock cars, were used—a different oil of
the same S. A. E. grade in each.After the cars were broken in for 2,500
miles, they were drained, examined and a
fresh fill of five quarts put in each crank-
case. No more oil was added. Then the
crankcases were sealed by an AAA official.
The real test began. It was ordered that
they be driven at an average of 500 miles
a day at 50 miles an hour until their motors
failed to operate. Oil No. 4 was first to
fail at 1,713.2 miles. Oil No. 6 failed at
1,764.4 miles. Oil No. 5 ruined its motor
at 1,815.9 miles; three of them were out
of the running. The next day Oil No. 1
failed to lubricate and, its motor wrecked,
stopped at 2,266.8 miles.Two cars—two oils—still left in the test.
Oil No. 3, after a remarkable run of
3,318.8 miles, came to a shuddering stop,and the last competitor of New and Im-
proved Conoco Germ Processed Oil, was
out. The lone car, with this tremendously
vital oil, labeled No. 2, went on and on.
On the tenth day, at an almost unbeliev-
able total of 4,729 miles, it failed—an all-
time record mileage on a total of five quarts!The "Hidden Quart" of new oily pen-
etrativeness won—the greater film strength
and higher resistance to the effects of dilu-
tion—the absence of carbon and sludge—
all aided in this great achievement. It
firmly supported Conoco's patented prin-
ciple of added oiliness—it proved every
claim. Conoco alone can make oil this
way. It is covered by recent United States
patents.You can have this oil in your car, for it
costs no more than other quality oils.
Drive into a Conoco Station or dealer,
marked by the Red Triangle. Fill and
know the satisfaction, the freedom from
repairs, the economy of low consumption
that only Conoco gives.Five quarts of each brand of oil were carefully
put in the cars by AAA officials.Here are the Representatives of the Contest
Board of the American Automobile Associa-
tion who supervised every detail of the test
and attested to the records made.The official sealing of crankcases after fill of
five quarts was put in. No addition of oil was
permitted in this "destruction" test.

Warning

to new car owners . . .

Some car manufacturers are using new types
of bearings which will stand greater pres-
sures and temperatures, resulting from in-
creased power and speed. New and Im-
proved Conoco Germ Processed Motor Oil
has been exhaustively tested on these new
bearings. The results show that it gives them
greater protection against damage than
many straight mineral oils now on the market.
Protect your new car by using the motor
oil you can be sure of.Every Wednesday Night
